

CONSTRUCTION ENGINEERING GRADUATE PROGRAMS

The new Construction Engineering program under the Civil and Environmental Engineering Department prepares students for successful careers in all aspects of construction projects including planning and design, construction, maintenance and facility management. Students are taught to understand and solve complex industry problems as they gain first-hand experience and knowledge about many construction issues.

Students can pursue the Construction Engineering master's degree or a doctorate in Civil Engineering with a research specialization in construction. Active research is conducted on topics such as automation, applications of information and sensing technologies, construction safety, Building Information Modeling (BIM), and advanced construction methods and materials.

Student financial support is available for qualified students through fellowships, teaching and research assistantships, and loans.

Application fees: Ph.D. (domestic) - Free; Ph.D. (international) - \$65; MS (domestic)- \$55; MS (international) - \$65

JOHN AND MARCIA PRICE COLLEGE OF ENGINEERING

With strong support from the State of Utah, the college has significantly grown its facilities, equipment, and faculty. In 2023, we awarded 561 master's and doctoral degrees and reached more than \$106 million in engineering-related research expenditures (including sub awards).

LIVING IN UTAH

Known for its world-class skiing, hiking, and other outdoor adventures, Utah is more than just place to appreciate the wonders of nature. Salt Lake City and the surrounding area is brimming with arts and culture, including fine dining, a diverse music scene, the Sundance Film Festival, and endless other entertainment options.

Utah also took the top spot in U.S. News and World Report's "Best States" ranking for 2023. National highlights include:

- #1 Economy
- #1 Job Growth
- #1 Low Debt at Higher Ed Graduation
- #1 Growth of Young Population

RESEARCH STRENGTHS

Advanced Materials, Methods & Equipment

Automation

Building Information Modeling (BIM)

Finance and Risk Analysis

Green Building & Sustainability
